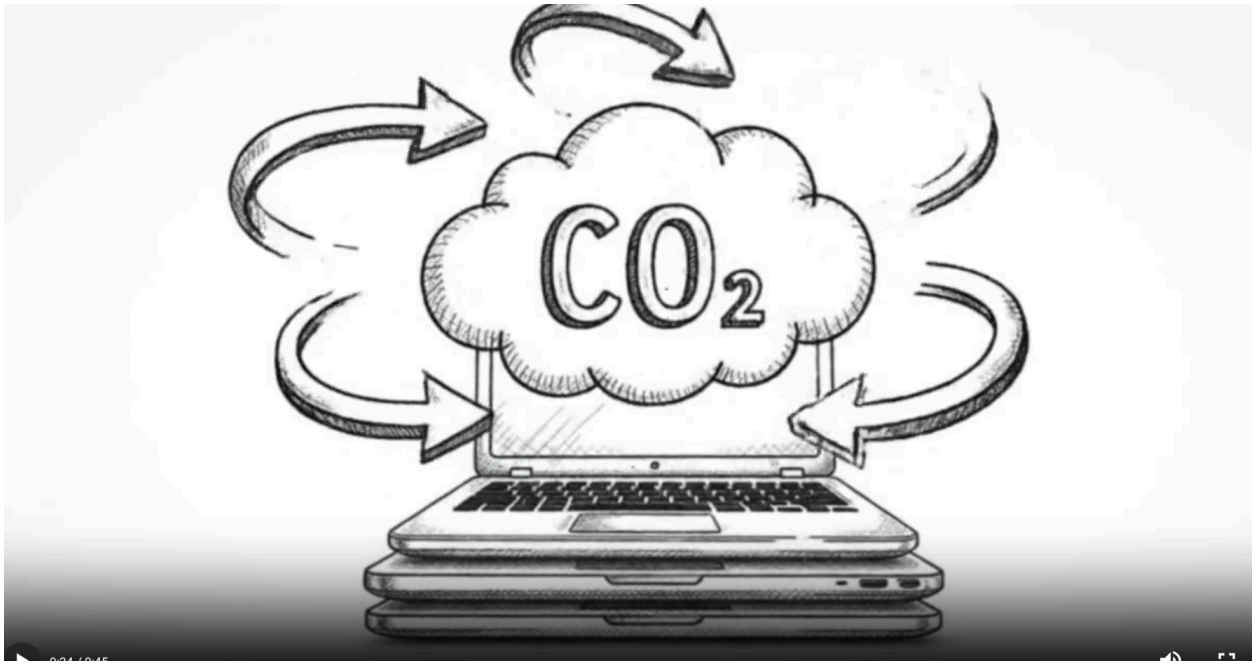
Reduce Scope 3 Emissions Through IT Reuse: A Business Guide by SocialBox.Biz

Sustainable IT Reuse Strategies for Scope 3 Emissions Reduction

(London, UK, 12 August 2025)



SocialBox.Biz, a London-based Community Interest Company, empowers businesses and universities to prioritise IT equipment reuse over recycling or disposal. This approach:

- **Reduces Scope 3 emissions**
- **Enhances ESG and CSR performance**
- **Promotes computer access inclusion**
- **Supports eco-friendly IT asset management**

What Are Scope 3 Emissions and Why IT Reuse Matters

Scope 3 emissions are indirect emissions across a company's value chain—such as those from manufacturing, transportation, and disposal of purchased goods. For IT, this includes:

- **Device production**
- **Logistics**
- **Energy use**
- **End-of-life treatment**

A circular economy model extends product lifespans, reducing waste even before items become waste and emissions. IT reuse is a key strategy for companies aiming to adopt sustainable, circular IT practices.

Benefits of IT Reuse for Businesses

- **Lower Scope 3 Emissions: Reused devices save up to 225 kg CO_2e each—double the savings compared to recycling.**
- **Boost ESG & CSR: Partnering with SocialBox.Biz demonstrates sustainability leadership.**
- **Improve impact: Ethical practices attract customers and investors.**
- **Cost-Effective: Reuse is often cheaper than recycling and increases community impact.**
- **Employee Engagement: Donation drives morale and purpose.**
- **Data Security: Certified data wiping ensures compliance.**
- **Computer access Inclusion: Donated laptops support education, employment, and connectivity.**

SocialBox.Biz IT Reuse Solutions

SocialBox.Biz offers tailored IT reuse solutions for UK companies and universities:

- **Laptop, MacBook, iPad, and iPhone donations**
- **Secure data destruction**
- **Impact reporting for CSR reports**
- **Tech lab training programs**

Corporate IT Reuse Solutions

Optimise your IT disposal strategy with these services:

Service	Benefit
Secure IT Reuse Before Disposal	Reduce emissions and protect data
Beyond IT Asset Disposition UK	Certified, responsible for more impact with local reuse before IT recycling.
Reuse Before Recycling	Maximise sustainability impact
Donate Old Laptops to Charity UK	Fulfil CSR goals
CSR/ESG-Compliant IT Asset Management	Align with governance standards
Secure Data Destruction	compliant wiping
Environmentally Responsible Disposal	Prioritise reuse over landfill

University IT Reuse Programs

Universities generate a significant amount of decommissioned IT hardware. SocialBox.Biz helps institutions:

- **Extend device lifecycles**
- **Support student access to technology**

- **Align with sustainability goals**

Key Services:

- **Secure data destruction (GDPR/WEEE compliant)**
- **Open-source software installation**
- **WEEE partnerships for non-reusable items**
- **Custom student donation initiatives**

Empower Students Through Laptop Donations

- **Bridge the Digital Divide: Enable access to education and jobs**
- **Custom University Collaborations: Tailored reuse programs**
- **Open-Source Innovation: No license fees, full functionality**

Take Action: Start Your IT Reuse Journey

For Businesses:

- **Book a free consultation to explore secure, impactful IT reuse.**

For Universities:

- **Contact SocialBox.Biz to launch sustainable IT and digital inclusion programs.**

Lead the Change: Adopt IT Reuse for Scope 3 Emissions Reduction

Join SocialBox.Biz in transforming IT disposal into a force for sustainability, inclusion, and corporate responsibility. Reuse before recycling—it's better for the planet, your people, and your purpose.
